[CONCERNING the *animal excrements* named above as former medicinal Simples, these, unless *recent*, and *quickly dried*, would undergo rapid fermentation, whilst giving off fetid smells in the presence of air and moisture: compounds of ammonia, phosphorus, and sulphuretted hydrogen, would be then evolved. But it is to be noted that no noxious *excretine*, such as human ordure produces, is contained in the droppings of herbivorous animals. A substance of the same nature is found, together with an acid of butter, in those of carnivorous mammals. Man discharges from the kidneys much of the phosphorus taken in his food: not so the cow, the horse, and the sheep, which reject this phosphorus in their solid droppings.]

HERBAL SIMPLES

APPROVED

FOR MODERN USES OF CURE.

A HANDBOOK OF CURATIVE HERBAL SIMPLES SUPPLIED FROM THE GARDEN, FIELD, HEDGEROW, AND STORE CLOSET.

PRESS NOTICES.

"A very useful work it is. There is more virtue in these medicines of the herb-wife than in an infinity of modern products of the chemical laboratory."—*Pall Mall Gazette.*

"Excellent as it was at the outset, the book is now better than it was before."—*Pharmaceutical Journal.*

"The book is one of the best modern works on its subject."—*Scotsman.*

"Dr. Fernie has succeeded in imparting to his subject a high degree of interest. The book is one from which the general reader will gain much useful information."—*Glasgow Herald.*

"Readers will find in this work a vast amount of useful information concerning the remedies yielded by herb and garden. The book ought to find a place in every home in the land; we are certain that were its value known every mother in the kingdom would make haste to procure a copy."—*Publishers' Circular.*

"Dr. Fernie's volume is full of interest and instruction."—*Bookseller.*

"A volume which will be an entertainment to the idly-disposed—a large class—and a source of instruction to any student of the oldest of all the arts."—*Daily Chronicle.*
