Che il distacco della Sicilia dall'Italia sia stato prodotto da straordinarie convulsioni del suolo causate da eruzioni ~~del fuoco~~ vulcaniche e che a questo fatto alluda la favola mitologica del ratto di ~~Proserpina~~ Proserpina eseguito da Plutone mentre essa coglieva fiori assieme ad un coro di ~~ninfe~~ ninfe nella valle dell'Etna lo si rileva da un notevole tratto del Poema di Claudiano de raptu Proserpinæ incominciando dai versi = Ecce repens ingens frangens convalle ; primique vibratis radicibus oppida vertit, coi molti altri che seguono tra i quali vi hanno quelli che equivalgono allo spirare di Plutone per irrompere dalle viscere della terra alla superficie di essa = Fraternum cupiens exire sub orbem — Janua nulla patet, prohibebant vadere rupes Oppositæ, durique Deum compage tenebant. Non fuit ille moras ; indignatusque frenabat Saxa ferit sceptro : sicubi sonuerat caverna, Turbatur Lipare : Hinc ignis, fornace relicta Mulciberi, et trepidus dejecit fulmina Cyclops. Audivit et si quem glacies alpina coercet, Et qui te latis nondum perdomitæ trophæis Tybris natat : missæque Pado qui remigat Alnon = Ai quali versi seguono poco dopo i seguenti = Postquam victa manu curvis ferrea vinxerat Jovem, et immenso late discessit regnatque, apparet subitus alto tinor : astra viarum mutavere fidem, vetitos se produnt arctos Æquore, præcipitat pigro formido Boötem : Horruit orion : audito pallidus Atlas hinnitu ~~[illegible]~~

In detto poema Claudiano prende occasione di paragonare i fenomeni che avvennero la Sicilia dall'Italia fino Gelo-niati nel rito del ratto di Proserpina a quelli che avvennero in Tessalia liberandola dalle acque, fenomeni dalla mitologia attribuiti ad altro nume cioè a Nettuno ed ecco i versi che esprimono tale similitudine = Sic cum Thessaliam scopulis inclusa tenebat Penco stagnante palus et mersa negabat Arva coli, trifida Nep-tunus cuspide montes Impulit adversos : tum fortis sanctus ictu Dissiluit gelido verbere Offeus Olympo : Carceribus laxantur aquæ, fractique meatu Redduntur fluviique mari, tellusque colonis —

Pare che secondo le tradizioni i fenomeni che avvennero la Sicilia dall'Italia fossero posteriori a quelli che diedero argomento alle narrazioni mitologiche delle guerre titaniche ossia de Giganti nei campi di Flegra e alla sovrapposizione dell'Etna al monte Olimpo (probabilmente come formato da eruzione vulcanica dell'Olimpo) si perviene che Claudiano fa dire a Proserpina invocante in soccorso Giove prospero mentre era trasportata dall'aggiatore Plutone quegli anni a prova della sua innocenza e del suo merito ad essere soccorsa = Nor ego cum rapido squirel Phlegra funditus signa Deis adversa tuli : non robore nostro Ossa primosum vexit glacialis Olympum. Quod conata nefas? aut cujus concia culpæ?

Che poi simili conflagrazioni nel globo terrestre dessero argomento alla mitologia delle guerre dei Giganti contro gli Dei, non solamente in Italia rispetto ai Campi Flegrei e in Grecia rispetto ai Monti Olimpo ed Ossa ma in altri luoghi ancora lo si rileva anche da Giustino il quale descrivendo la Spagna nel libro 3° capo 4 dice = Saltus vero Tartessiorum in quibus Titanas bellum adversus Deos gessisse proditur incolere Curetes, quorum Rex vetustissimus Geryon multos cultoribus usum pecunias invenit = ~~[illegible]~~ appellatos (Biblioteca lib. 1.) Narra che Cerere per trovar Proserpina percorse tutto l'orbe terrestre accensis facibus.

Secondo Appollodoro (Biblioteca lib. 1°) che narra una lunga serie di fatti tra i Giganti e gli Dei, il Gigante Encelado mentre fuggiva fu coperto e sepolto per fatto di Minerva che gli cacciò addosso l'isola di Sicilia. Pesia appollodoro soggiunge che la terra indignata pei giganti suoi figli ribellati dagli Dei si mescolò col Tartaro e partorì in Sicilia Tifone composto di duplice natura umana e ferina il quale superava per mostruosità di corpo e per forze tutti gli altri che la terra aveva generati : Fino alle ginocchia aveva forma umana e immensa estensione, cosicchè sembrava più alto delle cime e ogni montagna e colle toccava spesso gli astri ecc. aveva fatto negli occhi, fiammeggiava in cielo lapidi roventi con fischio e boato. Gli Dei veduto l'avventarsi di Tifone contro il cielo volti in fuga presero a correre in Egitto e veduto che Tifone gli inseguiva in più trasmutarono in diverse forme e animali : che Giove ~~[illegible]~~ Tifone con un falcione o lo inseguì fino al Monte Casio figlio Affrodite della Siria, ma Tifone avvolto Giove nelle sue spire lo trasportò in Cilicia e lo depositò nell'antro Corcio recidendogli i nervi : che Giove ricuperato l'uso de nervi colli ajuto di Mercurio e di Egipane prese di nuovo ad inseguire Tifone fino al monte Nisa lanciandogli fulmini. Tifone ingannato dalle parche che gli dicevano a qualsiasi cibo mangiasse in Tracia e combattendo presso il monte Emo lanciò intere montagne : ma disturbato dalla nuova forza di fulmini sparse molto sangue, dal quale diessi nome il nome di Emo : E mentre aveva cominciato a fuggire pel mare Siculo Giove gli lanciò addosso il monte Etna di meravigliosa capacità, dal quale fino a quello tempo (dice appollodoro) pel frequente scoppiare di fulmini dicono in esso formarsi spiragli di fuoco. (Questa fuga degli Dei in Egitto per l'invasione che Tifone faceva dalla Sicilia e perchè prese anche ad inseguirli secondo allusione ad una migrazione di popoli dalla Sicilia e dall'Italia ~~[illegible]~~ rifugiatisi nell'Egitto.

Di questa mitologia della fuga degli Dei in Egitto causata dallo spavento incusso loro dal Gigante Tifeo (Etna) ~~Claudiano~~ parla anche Lattanzio e Ovidio metamorf. Lib. 5. vit 319 et seqq.

Claudiano nello stesso poema de raptu Proserpinæ libro terzo descrive un bosco che vestiva buona parte dell' Etna, ed alle cui piante, così dice, Giove aveva appeso quali trofei della sua vittoria contro i Giganti le lacere membra di costoro e sembra che ai Giganti, od almeno ad essi attribuisca la forma e immani serpenti, giacchè così si esprime = Lucus erat prope flumen Acin, quem candida praefert Saepe quasi puteoque secat Galatea natatu, Densus et innexis Etnea cacumina sylvis, Qua licet usquam legens. Illic posuisse cruentam Egida, captivumque pater post praelia praedam duxisse datur. Phlegraeis sylva superbit exuviis: totum nemus victoria vestit. Hic patulis rictus: hic prodigiosa gigantum tergora dependent, et adhuc crudele minantur affixae facies truncis: immaniaque ossa Serpentum passim tumulis exanguibus albent: Et rigidae, multo suspirant fulmine pelles. = Quelle parole immaniaque ossa serpentum, sembrano alludere ad una tradizione ai tempi di Claudiano tuttora esistente che nelle prime epoche del globo terrestre questo fosse appunto popolato da immani rettili, fatto questo accertato ora dalla scienza della geologia e dagli scheletri fossili ritrovati = Simili rettili i geologi chiamano animali Saurinni o Chelonii ed il Malacarne nel suo trattato di storia naturale (Milano 1856) parlando di essi nella parte Zoologia così si esprime = Innanzi di porre termine a questo abbozzo della storia dei Sauriani credo bene aggiungere che in epoche anteriori al diluvio universale esisteva sulla terra un gran numero di rettili giganteschi, dei quali si perdettero le razze, e di loro oramai non ci rimangono che pochi scheletri, allo stato fossile, raccolti nei più rinomati musei ecc. Anche il famoso Tifone mostruoso appare (metamorfosi [illegible] [illegible]) [illegible] [illegible] [illegible] [illegible] [illegible] rettili –

Anche la favola di Fetonte estesamente narrata da Ovidio nel secondo libro delle metamorfosi sembra aver avuto origine da antiche conflagrazioni avvenute nel globo terrestre. Fu allora, dice ovidio, che la Libia divenne arida (metamorfosi libro 2°)

— Ciò, che, come si vide, narrasi da Appollodoro rispetto agli Dei raggiunti in Egitto da Tifone e convertitisi per timore di lui in bestie Igino nel suo trattato di astronomia parlando della Costellazione Capricorno dice narrarsi pure dai Sacerdoti Egizi e da alcuni poeti

Apud Tyrrhenos, qui et Tusci dicuntur, historiam scripsit vir peritus. Ait enim, opificem rerum omnium Deum duodecim annorum millia impendisse impendisse rebus omnibus a se conditis, easque in duodecim, quæ vocentur domos, distribuisse. Ac primo millenario fecisse cælum et terram: altero fecisse firmamentum id quod appareat et vocasse cælum: tertio mare et aquas in terra omnes: quarto lumina magna Solem et Lunam, et stellas: quinto animam omnem volucrum et reptilium et quadrupedum in aere terra et aqua degentium: sexto vero hominem (Φαινε) παρελυθεναι, videtur pretermisisse). Videntur itaque primi sex millenarii ante formationem hominis præteriisse, et reliquos sex millenarios duraturum esse genus hominum: ut sit universum tempus consummationis, annorum 12,000. (Suidas

Quapropter non oportet historiographos potentiam Tyrrhenorum ad eam regionem referre, in qua nunc habitant. Sed ad priscos illos campos et occasione ex iis locis accepta cum iis ob vicinitatem loci Galli frequenter commutabantur. Illi specie ac fœcunditate regionis pelecti, aliquandiu hanc occasionem exercitum comparant, deique in Tyrrhenos impetu, finibus expellunt, campos deinceps ipsi sortiuntur.
